PT   New human proliferation and apoptosis related protein polypeptides used
PT   for diagnosis, treatment and prevention of cell proliferative,
PT   immunological and reproductive disorders -
XX
PS   Claim 1; Page 89-90; 128pp; English.
XX
CC   The present sequence represents a human proliferation and apoptosis
CC   related protein (PROAP). The polypeptides and polynucleotides can be
CC   used for the diagnosis, treatment and prevention of cell proliferative,
CC   immunological and reproductive disorders. Disorders associated with
CC   decreased expression or activity of include arteriosclerosis, cirrhosis,
CC   hepatitis, psoriasis, melanoma, lymphoma and cancers of the breast,
CC   brain and prostate, acquired immune deficiency syndrome (AIDS),
CC   allergies, anaemia, asthma, diabetes mellitus, osteoarthritis,
CC   endometriosis, uterine fibroids and disruptions of the menstrual cycle.
CC   Antibodies against PROAP can be use in diagnosis of disorders
CC   characterized by PROAP e.g. in ELISA (enzyme linked immunosorbent
CC   assays) and the polynucleotides may be used to detect and quantify gene
CC   expression in biopsied tissues. These techniques can also be used to
CC   monitor regulation of PROAP levels during therapeutic intervention.

PT   EB1 DNA and polypeptide(s) - used to determine a pre-disposition to
PT   or diagnose neoplasms and to assess treatment options.
XX
PS   Claim 5; Page 19-21; 45pp; English.
XX
CC   This sequence is that of an EB1 protein (EcoRI Binding Fragment protein
CC   1). This cellular protein associates with the carboxyl terminus of APC
CC   (adenomatous polyposis coli) tumour suppressor gene product. The APC
CC   tumour suppressor gene plays an important role in the development of both
CC   sporadic and familial forms of colorectal cancers. Because most APC
CC   mutations result in the truncation of the APC protein, these mutant APC
CC   proteins cannot associate with EB1.  This suggests that the interaction
CC   between APC and EB1 is important for the normal function of APC and that
CC   loss of this association is essential for the development of colorectal
CC   cancer. By assaying for the presence of APC-EB1 protein complexes in a
CC   cell, a predisposition to or diagnosis of neoplasms can be determined.
CC   EB1 can also be used to assess treatment options for cancer cells (which
CC   are good candidates for treatment with cyclooxygenase inhibitors).

PT   Examining the ischemic condition (e.g. occlusive ischemia) by measuring
PT   expression levels of particular genes defined in the specification or
PT   by determining the expression profile of a gene group comprising these
PT   genes -
XX
PS   Claim 2; Page 676-677; 2690pp; English.
XX
CC   The present invention describes a method for examining ischaemic
CC   conditions, comprising measuring the expression levels of particular
CC   genes (I) in a test sample or determining the expression profile of a
CC   gene group in the sample comprising genes selected from (I). The method
CC   is useful for examining the ischaemic condition (e.g. compressive
CC   ischaemia, occlusive ischaemia or vasospastic ischaemia) by measuring
CC   expression levels of particular genes (ABI99202 to ABI99912, encoding
CC   the protein sequences in ABB57020 to ABB57374) or by determining the
CC   expression profile of a gene group comprising these genes. The
CC   expression levels or expression profiles produced by these genes are
CC   used as an indicator when screening for ischaemic condition-improving
CC   drugs or therapeutics for ischaemic diseases. ABI99913 and ABI99914
CC   represent PCR primers for a mouse ischaemic condition related sequence,
CC   which are used in the exemplification of the present invention.

PT Nucleic acids encoding 4277 human colon cancer-associated polypeptides,
PT useful for preventing, diagnosing and/or treating colorectal cancers -
XX
PS Claim 11; Page 6436-6437; 9803pp; English.
XX
CC AAH32943 to AAH37195 and AAG73514 to AAG77788 represent human colon
CC cancer-associated nucleic acid molecules (N) and proteins (P), where
CC the proteins are collectively known as colon cancer antigens. The colon
CC cancer antigens have cytostatic activity and can be used in gene
CC therapy and vaccine production. N and P may be used in the prevention,
CC diagnosis and treatment of diseases associated with inappropriate P
CC expression. For example, N and P may be used to treat disorders
CC associated with decreased expression by rectifying mutations or deletions
CC in a patient's genome that affect the activity of P by expressing
CC inactive proteins or to supplement the patients own production of P.
CC Additionally, N may be used to produce the colon cancer-associated Ps,
CC by inserting the nucleic acids into a host cell and culturing the cell
CC to express the proteins. N and P can be used in the prevention, diagnosis
CC and treatment of colorectal carcinomas and cancers. AAH37196 to AAH37204
CC and AAB77789 represent sequences used in the exemplification of the
CC present invention.
CC N.B. Pages 666 to 682 and page 7053 of the sequence listing were
CC missing at time of publication, meaning no sequences are present for
CC SEQ ID NO:1027 to 1052, 7921 and 7922.

PT   RP proteins associated with T cell activation and binding to
PT   adenomatous polypopsis coli protein - and assays for diagnosing
PT   e.g. colorectal cancer, or pre-disposition to it, and aberrant T
PT   cell activation, also related nucleic acid, vectors, transformed
PT   cells and antibodies
XX
PS   Claim 9; Page 22-23; 33pp; English.
XX
CC   This polypeptide comprises human RP1, a novel member of the EB1
CC   family which is associated with T cell activation, and which binds
CC   to normal, but not carboxy end-truncated, adenomatous polyposis coli
CC   (APC) protein.  RP1 was identified using a differential mRNA
CC   technique designed to isolate molecules which were differentially
CC   expressed following combined stimulation by CD3 and CD28 trigger
CC   molecules.  The full-length cDNA sequence was obtained by RACE PCR.
CC   RP2 and partial RP3 clones (see AAV18078 and AAV18079) were also
CC   identified.  A claimed method for determining expression of an
CC   aberrant form of APC protein involves contacting the sample with at
CC   least part of an RP protein (especially RP1, RP2 or RP3) able to
CC   bind to normal, but not aberrant APC protein, and measuring any
CC   binding of the APC protein to the RP protein.  Detecting aberrant
CC   APC protein can be used for diagnosis of, or determining
CC   predisposition to, colorectal cancer, ulcerative colitis and
CC   Crohn's disease.  A claimed method for screening for a disorder
CC   characterised by inappropriate T cell activation involves contacting
CC   a T cell sample with a nucleic acid encoding RP1, RP2 or RP3 and
CC   determining any hybridisation.  Such activation may indicate T-cell
CC   lymphoma and this could be treated with RP inhibitors.

PT   Nucleic acids encoding a range of human polypeptides, useful in genetic
PT   vaccination, testing and therapy -
XX
PS   Claim 20; Page 306; 765pp; English.
XX
CC   The invention relates to novel human secreted polypeptides. The
CC   polypeptides and antibodies to the polypeptides are useful for
CC   determining the presence of or predisposition to a disease associated
CC   with altered levels of polypeptide. The polypeptides are also useful for
CC   identifying agents (agonists and antagonists) that bind to them. Cells
CC   expressing the proteins are useful for identifying a therapeutic agent
CC   for use in treatment of a pathology related to aberrant expression or
CC   physiological interactions of the polypeptide. Vectors comprising
CC   the nucleic acids encoding the polypeptides and cells genetically
CC   engineered to express them are also useful for producing the proteins.
CC   The proteins are useful in genetic vaccination, testing and
CC   therapy, and can be used as nutritional supplements. They may be used to
CC   increase stem cell proliferation; to regulate haematopoiesis; and in
CC   bone, cartilage, tendon  and/or nerve tissue growth or regeneration;
CC   immune suppression and/or stimulation; as anti-inflammatory agents; and
CC   in treatment of leukaemias. AAU29510-AAU33304 represent the amino acid
CC   sequences of novel human secreted proteins of the invention.

PT   New isolated nucleic acid detection reagent for detecting 1000 or more
PT   genes from Drosophila and for elucidating cell signalling and cell-cell
PT   interactions -
XX
PS   Disclosure; SEQ ID NO 6108; 21pp + Sequence Listing; English.
XX
CC   The invention relates to an isolated nucleic acid detection reagent
CC   capable of detecting 1000 or more genes from Drosophila. The invention is
CC   useful in developmental biology and in elucidating cell signalling and
CC   cell-cell interactions in higher eukaryotes for the development of
CC   insecticides, therapeutics and pharmaceutical drugs. The invention
CC   discloses genomic DNA sequences (ABL16176-ABL30511), expressed DNA
CC   sequences (ABL01840-ABL16175) and the encoded proteins
CC   (ABB57737-ABB72072).
CC   The sequence data for this patent did not form part of the printed
CC   specification, but was obtained in electronic format directly from WIPO
CC   at ftp.wipo.int/pub/published_pct_sequences.

PT   New isolated nucleic acid detection reagent for detecting 1000 or more
PT   genes from Drosophila and for elucidating cell signalling and cell-cell
PT   interactions -
XX
PS   Disclosure; SEQ ID NO 25155; 21pp + Sequence Listing; English.
XX
CC   The invention relates to an isolated nucleic acid detection reagent
CC   capable of detecting 1000 or more genes from Drosophila. The invention is
CC   useful in developmental biology and in elucidating cell signalling and
CC   cell-cell interactions in higher eukaryotes for the development of
CC   insecticides, therapeutics and pharmaceutical drugs. The invention
CC   discloses genomic DNA sequences (ABL16176-ABL30511), expressed DNA
CC   sequences (ABL01840-ABL16175) and the encoded proteins
CC   (ABB57737-ABB72072).
CC   The sequence data for this patent did not form part of the printed
CC   specification, but was obtained in electronic format directly from WIPO
CC   at ftp.wipo.int/pub/published_pct_sequences.
